Aman Patel

Lucknow, Uttar Pradesh | 9918318385 | amanpatelsrm@gmail.com | LinkedIn | GitHub

Summary

Final-year CSE (Data Science) student at SRM IST with 8.83 CGPA. Published researcher (ICCCNet 2026, 98.2% accuracy) with 4 production-deployed projects spanning ML, full-stack, and real-time systems. Proficient in MERN Stack, TensorFlow, and LLM integration. Seeking SDE, ML, or Data Engineering roles.

Education

SRM Institute of Science and Technology, Kattankulathur — Chennai, India
B.Tech, Computer Science and Engineering – Data Science — *2023 – 2027*
CGPA: 8.83/10

Projects

AI-Based Chicken Disease Detection System | *Python, TensorFlow, VGG16, MobileNetV2, OpenCV, Flask, Next.js ,Firebase*
- Built dual-pipeline CNN on 5,000+ images to detect Coccidiosis in poultry; VGG16 + MobileNetV2 ensemble achieved **98.2% accuracy** – published at ICCCNet 2026, ADROID Conference Series
- Integrated Gemini RAG for disease Q&A and Sarvam AI for multilingual voice-based diagnosis across 5+ languages
- Deployed on Vercel with Docker; achieved **sub-2s inference time** and 99.9% uptime over 3+ months

AI Career Path Generator | *React.js, Node.js, Express.js, MongoDB, OpenAI API*
- Built SaaS platform generating personalized career roadmaps via GPT-4, cutting manual research time by **70%+**
- Integrated LLM-powered resume analyzer extracting 15+ skill signals with ATS optimization insights
- Implemented AI Mentor chatbot for mock interview prep and career guidance, supporting 50+ curated question flows

EasyTrip – Real-Time Multi-Rider Coordination & Safety Platform | *React.js, Node.js, Express.js, Socket.io, Leaflet*
- Built real-time group ride platform with 6-character invite codes, live GPS tracking via `watchPosition()`, synchronized route polylines, and instant checkpoint sync across all riders
- Designed SOS alert system broadcasting full-screen distress overlays and coordinates to all riders in <**500ms** via Socket.io

CampusConnect – Real-Time College Networking Platform | *MERN Stack, Socket.io, WebRTC, JWT, MongoDB Atlas*
- Built college-exclusive networking platform with real-time chat (Socket.io), WebRTC video calls, and LinkedIn-style profiles
- Implemented JWT auth, bcrypt password hashing, OTP email verification via Nodemailer, and protected route middleware
- Integrated Gemini API for AI resume analysis and ATS scoring; deployed on Vercel + Render with MongoDB Atlas

Publications

AI-Based Chicken Disease Detection using CNN – ADROID Conference Series: Engineering Sciences and Technology (ICCCNet 2026), SRM IST, Chennai, 2026

Skills

Programming Languages: Python, Java, C++, SQL
Full Stack Development: MERN Stack, Next.js 14, REST APIs, JWT Authentication, Socket.io, WebRTC
AI & Machine Learning: ML, Deep Learning (CNN), TensorFlow, Scikit-learn, OpenCV, Gemini API, OpenAI API, MLOps
Frameworks & Libraries: React.js, Node.js, Express.js, Flask, Tailwind CSS, Framer Motion
Databases & Cloud: MongoDB Atlas, Firebase, Vercel, Render, Docker
DevOps & Tools: Git, CI/CD, Postman, Vite

Certifications

Java Programming (Elite Certificate) – NPTEL IIT (via SWAYAM/NPTEL)
AWS Certified AI Practitioner (Foundational)
AWS Certified Cloud Practitioner (Foundational)
Introduction to Machine Learning – NPTEL IIT Kharagpur
C Programming – SRM IST Chennai
