Professional Summary

B.Tech Computer Science and Engineering (Data Science) student at SRM Institute of Science and Technology with an 8.83/10 CGPA and hands-on experience building full-stack applications and AI-powered systems. Developed a real-time multi-rider coordination platform using React, Node.js, Express.js, and Socket.io, and contributed to a CNN-based poultry disease detection system reporting 98.2% accuracy. Proficient in programming fundamentals and experienced with REST APIs, database technologies, and AI integrations. AWS Certified AI Practitioner and Cloud Practitioner, with a research publication at ICCCNet 2026. Seeking entry-level Software Engineer opportunities focused on backend development and application engineering.

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL, C/C++
Backend Development: Node.js, Express.js, Flask, REST APIs
Frontend Development: React.js, Next.js
Databases: MySQL, MongoDB Atlas, Firebase
Tools and Cloud: Git, GitHub, Docker, AWS, Postman, Vite
AI/ML: TensorFlow, Deep Learning, CNNs, NLP, LLMs, Gemini API, OpenAI API, RAG
Core CS: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Projects

1. AI-Based Chicken Disease Detection System (GitHub | Live Demo) Feb 2026 – Jun 2026
Tech Stack: Python, TensorFlow, Next.js, Flask, Firebase
- Minor project – collected and annotated 5,000+ poultry images from Kaggle, GitHub and other online sources, and prepared the dataset for training the team's dual-pipeline VGG16 + MobileNetV2 CNN, which reached **98.2% accuracy** on Coccidiosis detection
- Engineered the Next.js frontend and authored the research paper, accepted and published at ICCCNet 2026 (ADROID Conference)
- Team integrated Gemini RAG for disease Q&A and Sarvam AI for multilingual voice diagnosis across 5+ languages

2. AI Career Path Generator (GitHub | Live Demo) Jan 2026 – Apr 2026
Tech Stack: React.js, Node.js, Express.js, MongoDB, OpenAI API
- Team project – architected a full-stack solution that uses GPT-4 to generate personalized career roadmaps, reducing the manual effort of researching career paths
- Developed an LLM-powered resume analyzer that extracts key skills and generates ATS optimization suggestions
- Constructed a live job search module aggregating listings from JSearch and Active Jobs DB (RapidAPI) with country, employment-type, and remote-only filters

3. EasyTrip — Real-Time Multi-Rider Coordination & Safety Platform (GitHub | Live Demo) Nov 2025 – Apr 2026
Tech Stack: React.js, Node.js, Express.js, Socket.io, Leaflet
- Solo project – designed and implemented a real-time group travel application with live GPS tracking and shared routes for multiple riders at once
- Developed invite-code-based trip management for creating and joining group trips
- Implemented an SOS emergency alert feature that instantly broadcasts distress notifications and rider coordinates to all connected group members via Socket.io

Education

SRM Institute of Science and Technology Kattankulathur, Chennai, India
B.Tech, Computer Science and Engineering — Data Science 2023 – 2027 | CGPA: 8.83/10

Certifications

AWS Certified AI Practitioner (Foundational) – Amazon Web Services Link
AWS Certified Cloud Practitioner (Foundational) – Amazon Web Services Link
Java Programming (Elite Certificate) – NPTEL IIT (via SWAYAM/NPTEL) Link
Introduction to Machine Learning – NPTEL IIT Kharagpur Link

Achievements

1st Prize — RADAR DETECTOR project, Techknow, 2023–2024
3rd Prize — Campus Connect project, MOZO-HACK, 7 March 2024
LeetCode: 250+ problems solved; 100 Days Badge

Publication

AI-Based Chicken Disease Detection Using CNN Paper Link
ADROID Conference Series: Engineering Sciences and Technology (ICCCNet 2026), SRM IST Virtual, 17 June 2026
- Research conducted under the guidance of Monica Bhavani M, Professor, SRM IST.
